DX-9100 training class

It takes a week to learn how to program this controller. This is a one day class to provide you the knowledge needed to approach one and look like you know what you are doing.

DX-9100 Navigation- The DX-9100 is a freely programmable controller. We will use a laptop and projector to show the students what a sample DX program looks like. All DX-9100s are programmed differently; we will attempt to teach the students, what to look for, how to understand what they are looking at, and how to begin trouble shooting.

**Nov 12, 8-3pm, \$300, 6 person limit
Class held at our Brighton office**
