Wholesalers of HVAC Controls and Solutions since 1945

Connected BACnet/IP and Wi-Fi HVAC Product Series Unifying HVAC & Lighting with nLight

- BTL Listed as BACnet Building Controllers, with embedded schedules, alarms and trend logs
- All models available with embedded ENVYSION web-based graphic design and visualization interface, for local hosting of application and monitoring graphics
- Simultaneous support of wired IP and Wi-Fi (Access point, client, hotspot), including support of Wi-Fi bridge. Two Ethernet ports allow controllers to be wired in daisy-chain topology and enable an STP loop-free topology configuration for redundancy and increased reliability
- Advanced, built-in security features and authentication services, for robust IP-based implementation
- Embedded support of BACnet MS/TP routing to IP, and Modbus integration, to cost effectively connect meters, VFDs and other devices without additional gateways
- Reduce programming and commissioning time by over 25% with EC-gfxProgram, graphical programming interface for custom applications, or configure preloaded applications with dynamic graphics available in select models
- Support of Smart Room Control solution, for unified HVAC, Lighting and shades/sunblind control
- Daisy-chain support of Allure™ Communicating Sensor series

Easily troubleshoot your application in real-time through live-debugging and a Watch List to monitor specific process variables and detect errors as they occur
